FOR IMMEDIATE RELEASE

TEAGUE NALL AND PERKINS, INC. WINS A TOP SPOT IN “BEST PLACES TO WORK IN D/FW” CONTEST

FORT WORTH, TEXAS (MAY 13, 2003) – The Dallas Business Journal ranked Teague Nall and Perkins, Inc. (TNP) the #2 small business to work for in their first annual “Best Places to Work in Dallas/Fort Worth” contest. TNP is a local civil engineering, surveying, and consulting firm with offices in Fort Worth, Dallas, and Denton.

The contest was designed to recognize those local companies that go the extra mile to create a vital workplace for their employees. Winners were divided into three categories: small businesses (1-100 employees); mid-size businesses (101-500 employees); and large businesses (501 or more employees). Companies of all types were ranked on business success, personal and professional development, corporate culture, benefits, and leadership. Employees completed online surveys, which counted for 60% of each company’s overall score.

TNP has received several awards based upon the firm’s excellent compensation packages and benefits, relaxed work environment, continuing education programs, and ample personal time off policies. Employees enjoy numerous on-site amenities, including a fitness center, basketball court, ping-pong table, a family resource center, and free parking. The firm also sponsors numerous social events throughout the year, including tailgate parties, a family picnic, a Christmas party, a chili cook-off, and basketball tournaments.

“Providing an enjoyable, rewarding, and stimulating work environment for our employees has always been one of our highest priorities,” commented Mark Berry, Vice President with the firm. “This company has been successful for twenty-six years for one reason--our people. Keeping our employees happy ultimately helps us keep our clients happy, and that’s what we’re all about.”

Teague Nall and Perkins, Inc. provides comprehensive civil engineering, surveying, and consulting services to public and private sector clients across North Texas. The firm provides consulting and engineering services for: water and wastewater systems, transportation system infrastructure, drainage systems, residential development, site design, airports, digital mapping, GIS, landscape architecture, golf course architecture, sports fields, parks and trails, and information technology (IT).
